Inspection(s) –

For duct detectors, a representative will have to be present at the time of the inspection and will be required to provide manufacturer testing procedures for duct detectors. If the procedures are not provided at the time of inspection, the inspection will be rejected and a reinspection fee will be due.

For sprinkler flow test, you will need to have fire alarm notification system ready to call dispatch. During testing we will need the fire alarm system to be put in and out of test mode.
